

Regulated AI Infrastructure for Financial Intelligence

Compliance.
Intelligence.
Precision.

A New Standard for Financial Systems

ITIXA is a mathematically governed AI platform engineered for financial accuracy, regulatory compliance, and real-time intelligence.

Built on the foundation of a leading UK accountancy practice, ITIXA transforms financial operations into a controlled, verifiable, and continuously updated system.

This is not bookkeeping.
This is financial infrastructure.

Accuracy

Compliance

Intelligence

The Problem With Modern Financial Systems

Businesses today operate in environments where:

-  Financial data is fragmented and delayed
-  Manual processing introduces material errors
-  VAT and compliance risks are increasingly complex
-  AI tools are opaque, inconsistent, and ungoverned

THE RESULT:

No trust in financial data | Regulatory risk | Poor decision making

The ITIXA Solution

A Fully Engineered Financial Intelligence Platform

-  01 Document ingestion (scan, email, mobile, upload)
-  02 Intelligent classification (invoice vs non-invoice)
-  03 Data extraction (amounts, VAT, dates, entities)
-  04 Mathematically consistent GL categorisation
-  05 Real-time financial reporting

OUTCOME

Accurate books | Fully compliant | Always up to date.

What Makes ITIXA Different

Mathematics-First Architecture

- ✓ Built on formal mathematical structures aligned with double-entry accounting
- ✓ Ensures consistency, stability, and explainability
- ✓ Eliminates probabilistic drift in financial outputs

Regulation-Ready by Design

- ✓ Aligned with UK GAAP, VAT frameworks, and Making Tax Digital
- ✓ Full audit trails and traceability of every decision
- ✓ Designed for regulated environments where accuracy is non-negotiable

Trustworthy AI

- ✓ Transparent, explainable outputs
- ✓ Controlled exception handling
- ✓ No “black box” decision-making

Enterprise-Grade Engineering

- ✓ Scalable architecture for growing businesses
- ✓ Secure, structured, and integration-ready
- ✓ Designed to support long-term operational growth

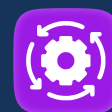

How ITIXA Works

Simple. Controlled. Immediate.

1. Upload

Invoices, receipts, and statements from any source

2. Process

AI extracts, classifies, and categorises

3. Validate

Exception handling ensures complete accuracy

4. Output

Real-time: Profit - Loss, Balance & VAT position

Core Capability: Financial Automation at Scale

- ✓ End-to-end invoice processing
- ✓ Bank and financial document extraction
- ✓ intelligent GL coding per business
- ✓ Real-time bookkeeping and reconciliations
- ✓ Continuous financial visibility

Business Impact

Measured, Not Promised

Up to

↓ **70% Reduction**

in processing time and cost

- » End-to-end invoice processing
- » Real-time financial reporting
- » Significant reduction in VAT and compliance risk
- » Improved audit readiness and financial confidence

Who ITIXA Is For

Designed for High-Growth and Regulated Businesses

SMEs and mid-sized companies
(£1m–£50m turnover)

High transaction volume
businesses

Organisations requiring
audit-ready financials

Businesses preparing for
funding, scaling, or exit

Sector Intelligence

ITIXA is built with sector-specific financial understanding:

Professional Services

Complex billing and
VAT handling

Retail & E-commerce

High-volume transactions
and digital VAT

Property & Real Estate

Capital structures and
VAT complexity

Construction

CIS compliance and subcontractor
workflows

A Complete Financial Ecosystem

Your ITIXA subscription includes:

- ✓ AI-powered financial processing
- ✓ Cloud accounting platform
- ✓ Bookkeeping and reconciliations
- ✓ VAT returns and compliance
- ✓ Statutory accounts preparation
- ✓ Payroll and company secretarial services
- ✓ Secure client portal
- ✓ Pension processing

From Accounting Practice to AI Infrastructure

ITIXA is not a theoretical platform. It is built from real-world financial operations, handling thousands of documents monthly across diverse industries.

This ensures:

- ✓ Practical reliability
- ✓ Regulatory alignment
- ✓ Proven operational performance

Leadership

Founded by Dr. Anjulika Salhan, a mathematician and national leader in AI and regulatory technology, ITIXA reflects a vision where:

*AI is engineered with mathematical rigour,
not approximated through heuristics.*

Our Philosophy

AI in finance must meet the same standards as:

- ✓ Aviation
- ✓ Medicine
- ✓ Critical infrastructure

Failure is not acceptable.

*ITIXA rejects “move fast and break things.”
We build systems that are precise, governed, and enduring.*

The Future of Financial Compliance

The next decade will be defined by:

Real-time
financial systems

Trustworthy AI

Automated
compliance

Organisations that adopt this shift early will lead.

Stop Managing Your Accounts. *Start Engineering Them.*
